

## Miraculous Report

In July 2016, our Apostolate received this miraculous report from an Apostle living in Illinois.

“My Mom was recently very ill. At 82 she had developed pneumonia. After several days of treatment in the hospital she was sent home. Unfortunately, she tripped, fell and broke three ribs and a spinal fracture. She returned to the hospital. Her condition deteriorated...developed pneumonia again. Was not responding to treatment. Her Dr called us in and said we needed to discuss DNR [Do Not Resuscitate]. We met the funeral director and arranged for her services. It was horrible.

I travel for work and usually stop in a small Catholic church in one of the towns I go to. I stopped in during this day. Only to find the church doors locked tight. This had never happened before. Feeling the need to spend time in prayer, I went on to another small town and stopped at the church there.

After praying I happened to be reading some of their announcements, etc on the bulletin board. I found a GS [green scapular] there with prayer card. I took the scapular and attached it to my Mom's hospital bed and prayed over her. The next day she began responding to treatment! After 2 more weeks in the hospital...she returned home. Now...two weeks later...we were able to attend Mass again together for the first time in over two months!!

She continues to do well and grow stronger. We continue to pray every night and...the scapular remains attached to her bed and tucked under her pillow.”
